

Business Requirements Document (BRD)

Smart Recruitment - NovaTech Solutions

Prepared for: NovaTech Solutions | **Prepared by:** Carol Felix, Business Analyst

Business Objectives

- Reduce average time-to-hire from 48–55 days to under 30 days.
 - Reduce candidate drop-off between shortlist and interview from approx 30% to under 15%.
 - Increase requisitions handled per recruiter by approx 30% by removing manual screening effort.
 - Provide real-time, proactive visibility into funnel status and SLA compliance.
-

Scope

In scope: Resume screening automation, interview scheduling automation, feedback SLA management, funnel dashboard, candidate status notifications, ATS-HRIS integration — piloted on bulk technical hiring (Java, Data Analyst, QA).

Out of scope: Leadership/specialist hiring, onboarding processes, offer-letter/compensation automation, candidate-facing ranking rationale.

Business Requirements

ID	Requirements	Traced From
BR-01	The system shall automatically parse and rank candidate resumes against weighted job description criteria	G-01
BR-02	The system shall present a ranked shortlist to the recruiter with visible scoring rationale for each candidate	G-01
BR-03	The system shall allow recruiters to manually override or include borderline scored candidates	G-01
BR-04	The system shall automatically propose conflict free interview slots based on candidate and	G-02

	panel calendar availability	
BR-05	The system shall auto book standard interview requests, with a defined window for recruiter override before confirmation is sent	G-02
BR-06	The system shall provide a structured feedback scorecard for panel members with a defined submission deadline	G-03
BR-07	The system shall send automated reminders to panel members who have not submitted feedback within the defined deadline	G-03
BR-08	The system shall define and track SLA thresholds at each funnel stage (screening, scheduling, feedback)	G-04
BR-09	The system shall automatically alert the recruiter and Head of Talent Acquisition when an SLA threshold is breached	G-04
BR-10	The system shall provide a real time dashboard showing funnel stage status for all active requisitions	G-05
BR-11	The system shall send automated status notifications to candidates at each funnel stage without disclosing internal ranking details	G-06
BR-12	The system shall integrate with NovaTech's existing HRIS via API with defined candidate data field mapping	G-07
BR-13	The system shall enforce access control and defined retention policy for candidate personally identifiable information (PII)	G-08

Assumptions

- NovaTech's existing HRIS supports API based integration
 - Hiring managers will adopt structured interview scorecards as part of the new process.
 - Outlook is the standard calendar system used company-wide for scheduling integration.
-

Constraints

- Implementation must not disrupt active, in-progress requisitions during rollout.
 - Solution must comply with candidate data privacy requirements.
 - Pilot rollout must be completed within one hiring quarter.
-

Success Metrics

- Time to Hire: From 48-55 days to under 30 days
- Candidate drop off(shortlist to interview) from approx 30% to under 15%
- Requisitions handled per recruiter should be +30%
- SLA breach alerts active for 100% of tracked funnel stages
